[1ST DECEMBER 1997]

1. This Act may be cited as the Industrial Designs Act.

2. In this Act—

   “Controller” means the Controller of the Intellectual Property Office appointed under section 3 of the Patents Act and any reference to the Controller shall be construed as including a reference to any officer discharging the functions of the Controller;

   “Court” means the High Court;

   “International Classification” means the classification according to the Locarno Agreement of October 8, 1968, establishing an International Classification for Industrial Designs;

   “Minister” means the Minister to whom responsibility for intellectual property has been assigned;

   “Paris Convention” means the Paris Convention for the Protection of Industrial Property of March 20, 1883, as last revised;

   “priority date” means the date of the earlier application that serves as the basis for the right of priority provided for in the Paris Convention;

   “Register” means the Register of Industrial Designs.

3. (1) For the purposes of this Act, any composition of lines or colours, any three-dimensional form or any material whether or not associated with lines or colours, is deemed to be an industrial design where such composition, form or material gives a special appearance to a product of industry or handicraft, can serve as a pattern for a product of industry or handicraft and appeals to and is judged by the eye.
(2) The protection under this Act does not apply to anything in an industrial design which serves solely to obtain a technical result and to the extent that it leaves no freedom as regards arbitrary features of appearance.

4. (1) An industrial design is registrable if it is new.

(2) An industrial design is new if it has not been disclosed to the public anywhere in the world by publication in tangible form or by use or in any other way, prior to the filing date or, where applicable, the priority date of the application for registration.

(3) For the purposes of subsection (2), disclosure to the public of an industrial design shall not be taken into consideration if the disclosure—

(a) occurred within twelve months preceding the filing date or, where applicable, the priority date of the application; and

(b) was by reason or in consequence of acts committed by the applicant or his predecessor in title or of an abuse committed by a third party with regard to the applicant or his predecessor in title.

(4) An industrial design that is contrary to public order or morality is not registrable.

5. (1) The right to registration of an industrial design shall belong to the creator.

(2) Where two or more persons have jointly created an industrial design, the right to registration of the industrial design shall belong to them jointly.

(3) If and to the extent to which two or more persons have created the same industrial design independently of each other, the person whose application has the earliest filing date or, if priority is claimed, the earliest validity claimed priority date, shall have the right to register the industrial design, as long as the said application is not withdrawn, abandoned or rejected.
(4) The right to an industrial design may be assigned or may be transferred by succession.

(5) Where an industrial design is created in execution of an employment contract, the right to registration of the industrial design shall belong, in the absence of contractual provisions to the contrary, to the employer.

(6) The creator shall be named as such in the registration of the industrial design unless he indicates to the Controller in a special written declaration signed by him and addressed to the Controller that he wishes not to be so named.

(7) A promise or undertaking by the creator made to any person to the effect that he will make a declaration referred to in subsection (6) shall be without legal effect.

6. (1) An application for the registration of an industrial design shall be filed with the Controller and shall contain a request, drawings, photographs or other adequate graphic representations of the article embodying the industrial design and an indication of the kind of product for which the industrial design is to be used.

(2) The application may be accompanied by a specimen of the article embodying the industrial design where the industrial design is two-dimensional.

(3) Where the applicant is not the creator, the request shall be accompanied by a statement justifying the applicant’s right to registration of the industrial design.

(4) The application may contain a declaration claiming priority, as provided for in the Paris Convention, of one or more earlier national or regional applications or international deposits filed by the applicant or his predecessor in title in or for any State party to that Convention.

(5) Where the application contains a declaration referred to in subsection (4), the Controller may require that the applicant furnish, within the prescribed time limit, a copy of the earlier application or international deposit, certified as correct by the office with which it was filed, and the effect of that declaration shall be as provided for in the Paris Convention.
(6) Where the Controller finds that the requirements under this section and the Regulations pertaining to a declaration are not fulfilled, the declaration shall be considered not to have been made.

(7) Two or more industrial designs may be the subject of the same application if they relate to the same class of the International Classification or to the same set or composition of articles.

(8) An application, at the time of filing, may contain a request that the publication of the industrial design, upon registration, be deferred for a period not exceeding twelve months from the date of filing, or if priority is claimed, from the date of priority, of the application.

(9) The applicant may withdraw the application at any time during its pendency.

(10) The application shall be subject to the payment of the prescribed application fee.

7. (1) The Controller shall accord as the filing date the date of receipt of the application provided that at the time of receipt, the application contains indications allowing the identity of the applicant to be established and the required graphic representations of the article embodying the industrial design.

(2) Where the Controller finds that the application did not at the time of receipt fulfil the requirements referred to in subsection (1), he shall invite the applicant to file the required correction and shall accord as the filing date the date of receipt of the required correction, but if no correction is made the application shall be treated as if it had not been filed.

(3) After according a filing date, the Controller shall examine the application for compliance with the requirements of section 6 and ascertain that the prescribed fee has been paid.

(4) The Controller shall examine whether the industrial design complies with the provisions of sections 3 and 4(4).
8. (1) Where the Controller is satisfied that the application complies with the requirements of sections 3 and 4(4), he shall register the industrial design, publish a reference to the registration and issue to the applicant a certificate of registration of the industrial design.

(2) Where a request for deferment of publication has been made under section 6(8), no representation of the design or any file relating to the application shall be open to the public for inspection and the Controller shall publish a notice of deferment which shall contain information identifying the registered owner, the filing date of the application, the length of time for which deferment has been requested and any other particulars as may be prescribed.

(3) During the period of deferment of publication, legal proceedings on the basis of a registered industrial design may not be instituted unless the information contained in the Register and in the file relating to the application has been communicated to the person against whom the action is brought.

(4) At the expiry of the period of deferment, the Controller shall publish the registered industrial design.

9. (1) The exploitation of a registered industrial design in Trinidad and Tobago by persons other than the registered owner shall require the agreement of the latter.

(2) For the purposes of this Act, “exploitation” of a registered industrial design means the making, selling, importing or otherwise distributing, for commercial purposes, articles bearing or embodying a design which is a copy, or substantially a copy, of the industrial design.

(3) The rights conferred by registration shall not extend to acts in respect of articles which have been put on the market in Trinidad and Tobago by the registered owner or with his consent.

10. (1) The registration of an industrial design shall be for a period of five years from the filing date of the application for registration.

(2) The registration may be renewed for two further consecutive periods of five years through the payment of the prescribed fee.

(3) A grace period of six months shall be allowed for the late payment of the renewal fee on payment of the prescribed surcharge.

(2) The surrender shall have effect from the date on which it is recorded.

12. (1) Any interested person may apply to the Court for the invalidation of the registration of an industrial design.

(2) The Court shall invalidate the registration of an industrial design if the person requesting the invalidation proves that any of the requirements of sections 3 and 4 are not fulfilled or if the registered owner of the industrial design is not the creator or successor in title.

(3) An invalidated registration of an industrial design, or part thereof, shall be regarded as null and void from the date of the registration.

(4) The decision of the Court or the decision on any appeal therefrom shall be notified to the Controller who shall record it and publish a reference to it as soon as possible thereafter.
13. (1) Any change in the ownership of the registration of an industrial design, or in the ownership of an application therefor, shall be in writing and shall, upon the request of any interested party made to the Controller, be recorded and, except in the case of an application, published by the Controller.

(2) A change under subsection (1) shall be of no effect against third parties until it has been recorded.

(2) The extension may be granted though the time for doing the act or taking the proceeding has expired.

23. The provisions of any international treaties in respect of industrial property to which Trinidad and Tobago is a party shall apply to matters dealt with by this Act and, in case of conflict with provisions of this Act, shall prevail over the latter.

24. The Minister may make Regulations prescribing all matters that are required or permitted by this Act to be prescribed, or are necessary or convenient to be prescribed for giving effect to the purposes of this Act.

25. Subject to the provisions of section 26, Parts II and III of the Patents and Designs Act (hereinafter referred to as “the former Act”) are hereby repealed and Part IV thereof insofar as it relates to industrial designs shall not apply.
